

Weekend Impacts on McCaslin Boulevard Diverging Diamond Interchange (DDI) Traffic Alignment Oct. 9-12

As part of the US 36 Express Lanes Project, a full weekend closure of McCaslin Boulevard over US 36 will take place the weekend of Oct. 9-12. This closure is necessary to align traffic into the new Diverging Diamond Interchange (DDI) configuration. The full closure will be in place from Friday, Oct. 9 at 9 p.m. through Monday, Oct. 12 at 5:30 a.m. Access over US 36 on McCaslin Boulevard will not be allowed as shown in red below. During the closure, all eastbound and westbound US 36 on- and off-ramps to McCaslin Boulevard will remain open with right turn access only as shown in green below. Left turns and through movements from the ramps to access McCaslin Boulevard will be closed during the alignment. Detours will be in place to guide the traveling public, but alternate routes are advised. .

The traveling public will need to be extra cautious when traveling on the new DDI for the first time. Traffic will be switched to the other side of the road and many of the lights will be removed, allowing free movements on and off of McCaslin Boulevard with yield movements. New signage will be in place. To view an instructional video on navigating the new DDI, click [here](#). Once the weekend activities have been completed, there will still be miscellaneous construction activities through December at the interchange including ramp paving, sidewalk and median construction, and the bridge arch installation. For more information, go to www.us36expresslanes.com or call the project hotline at 303-404-7042.
